SUMMARY

Experienced with Amazon Web Services (AWS), including designing and managing cloud solutions. Good at setting up secure, cost-effective, and reliable cloud systems. Familiar with AWS DevOps for automating software delivery. Able to solve problems and improve performance to keep cloud operations running smoothly.

SKILLS

- AWS
- EC2
- S3
- ECS
- IAM
- VPC
- Auto Scaling
- Load Balancing
- CloudWatch
- CI/CD Pipeline
- RDS Database
- Continuous Integration
- DevOps
- Linux
- Docker
- Terraform
- Kubernetes
- Git

EDUCATION

Bachelor of Technology : Computer Technology
Rashtrasant Tukadoji Maharaj Nagpur University - Nagpur
June 2025

Higher Secondary School (HSC)
Prakash jr. College Adyal - Bhandara
June 2020

Secondary School (SSC)
Prakash High School Adyal - Bhandara
June 2018

EXPERIENCE

Anyatam-Adhyayan Education Services Pvt. Ltd.
Pune, Maharashtra
Cloud & DevOps Intern
07/2024 - 10/2024

- During my Cloud & DevOps internship, I gained experience in automating infrastructure, managing cloud services, and improving deployment workflows. I worked with development and operations teams to build and maintain scalable cloud environments, I also helped manage continuous integration and deployment pipelines with AWS CodePipeline, making the software release process smoother and faster.

PROJECTS

1. **Created an Application Load Balancer and Auto Scaling Group in Own VPC**

- In this project, I created a custom VPC in AWS to enhance application scalability and availability. I configured an Application Load Balancer (ALB) for traffic distribution and an Auto Scaling Group to adjust instances based on demand.

CERTIFICATES

Cloud & DevOps Course Certificate
Cloud & DevOps Internship Certificate
